### About BioOne Complete

BioOne Complete is BioOne's aggregation of 200 high quality, subscribed and open-access titles focused in the biological, ecological, and environmental sciences. For subscribing libraries, BioOne Complete offers a cost-effective, curated collection of independently-published journals. More than three-quarters of the subscribed titles are ranked in Thomson Reuters' Journal Citation Reports, and 45% are available online exclusively in BioOne Complete.

For its nonprofit publishing participants—societies, associations, museums, research institutions, and university presses—the BioOne aggregation offers a dynamic platform, cohort affiliation, and an ancillary annual revenue stream from aggregated sales. Since 2001, BioOne has returned over \$35 million to its nonprofit publishers, helping them remain financially sustainable and editorially independent.

Visit our new organizational website [bioonepublishing.org](http://bioonepublishing.org) to learn more about the nonprofit publisher behind BioOne Complete.

BioOne is the product of innovative collaboration between scientific societies, libraries, academe and the private sector.

## Publisher

BioOne, USA

## Brief History

BioOne was established in 1999 in Washington, DC, as a non-profit organization by five scholarly collaborators: the American Institute of Biological Sciences, the Scholarly Publishing and Academic Resources Coalition (SPARC), The University of Kansas, Greater Western Library Alliance, and Allen Press.

## Scope and Coverage

BioOne includes near about 200 high quality, subscribed and open-access titles focused in the biological, ecological, and environmental sciences. For subscribing libraries, BioOne Complete offers a cost-effective, curated collection of independently-published journals. More than three-quarters of the subscribed titles are ranked in Thomson Reuters' Journal Citation Reports,

and 45% are available online exclusively in BioOne.

### ***Kind of Information***

Within an entry (journal) detail bibliographic information includes title, editor names, print ISSN, online ISSN, impact factor, frequency, cover page image of that particular entry present.
