National Union Catalogue of Scientific Serials in India (NUCSSI) is the first indigenous database that serves as an ideal tool to access Journal holdings information. Journals are the main source of Science and Technology information. NUCSSI is a data repository of a large number of unique journal titles and library holdings belonging to major universities, S&T institutions, R&D units of industries, higher institutes like IISc, IITs and professional institutes spread all over the country.

**Features**

- NUCSSI provides information regarding the availability of journal titles in the libraries. Moreover, integration of database with E-mail service enables routing of library/user request information.
- The Regular update of the database is enhanced with the online access granted to the participating libraries via internet, so that journal seekers can get the updated information free of cost.

## Brief History

The project for the compilation of NUCSSI was initiated by NISCAIR in 1965. The computerization of NUCSSI was taken up in the early 1970s though the work was carried out manually up to 1971. In 1988, NISCAIR acquired a PSI Sirius 32 system which gave real impetus to the computerization of NUCSSI. In the 1990s, access to the database was made available online via a

modem. NISCAIR also produced a CD-ROM version of the NUCSSI database that covered the holdings information of 425 major libraries in India updated to 2001. The NUCSSI activity was hampered due to the shortage of staff between 2002 and 2008 but was revived in July 2008. The NUCSSI database was mounted on a secure server in February 2009 offering free access to the users and IP based access to participating libraries.

**Scope and Coverage**

National Union Catalogue of Scientific Serials in India (NUCSSI) is the first major indigenous database created at NISCAIR erstwhile INSDOC. It is a repository of about 266210 holdings data pertaining to over 45632 unique serial titles held in over 565 libraries of scientific institutions, universities, R&D units of industrial complexes and higher level institutes (such as the Indian Institute of Science), and professional institutes in various disciplines throughout India. All scientific and technical serials covering subjects falling under the main classes of the Universal Decimal Classification system have been included.

**Kind of Information**

The NUCSSI provides tables such as journal title list, holdings, library detail are present here. Also long list of city name and name of institutions which are situated under that particular city available here. Here List of journals i.e. journal titles are available through a clear chart.
