NOW - AUGUST 13

TICKETS FROM \$59

Mathematics is a field that many people shy away from, but there are some who had a passion for numbers and making discoveries regarding equations, measurements, and other numerical solutions in history. They looked for ways to understand the world as it relates to numbers and their contributions have been very important for their generation and beyond. Below is a list of names and accomplishments of the greatest mathematicians of all time. You can read through the list and learn more about these people and how they used their mathematical abilities to make their mark on the world.

Albert Einstein (1879-1955)
Nationality: German, American
Famous For: $E=mc^2$
Albert Einstein excelled in mathematics early in his childhood. He liked to study math on his own. He was once quoted as saying, "I never failed in mathematics... before I was fifteen I had mastered differential integral calculus."

Isaac Newton (1642-1727)
Nationality: English
Famous For: Mathematical Principles of Natural Philosophy
The book of Sir Isaac Newton, *Mathematical Principles of Natural Philosophy*, became the catalyst to understanding mechanics. He is also the person credited for the development of the binomial theorem.

Leonardo Pisano Bigollo (1170-1250)
Nationality: Italian
Famous For: Fibonacci sequence
Heralded as "the most talented"

Thales (c. 624 – c.547/546 BC)
Nationality: Greek
Famous For: Father of science & Thales' theorem

"IT LIGHTS UP THE SKY AND OUR HEARTS."

Scope and Coverage

Mathematics is a field that many people shy away from, but there are some who had a

passion for numbers and making discoveries regarding equations, measurements, and other numerical solutions in history. They looked for ways to understand the world as it relates to numbers and their contributions have been very important for their generation and beyond. This site contains list of names and accomplishments of the greatest mathematicians of all time and how they used their mathematical abilities to make their mark on the world.

Kind of Information

Entry contains date of birth, date of death, nationality, fields, famous for which purpose, famous in which field, education, career, achievement, award, books and innovation etc with photograph. Related biographies are linked beside each entry.

Special Features

- ❖ Links of Famous philosophers and famous explorers are presented at the front page of this site.
- ❖ Links of some articles like main topics in mathematics, careers in mathematics, math level in school, top awards in mathematics, famous math theories that are wrong, practical application of mathematics.

Arrangement Pattern

No particular arrangement of biographical entries is presented at home page. Related biographies are shown with each entry which is arranged alphabetically by forename.

Remarks

The coverage of this site is not good. Few biographies of notable mathematician are presented with enough description. This site is helpful to get idea of famous mathematician.

Comparable Tools

- The hundred greatest mathematician of the past
