Introducing NNDB Mapper

The [NNDB Mapper](#) is a visual tool for exploring the connections between people in NNDB, linking them together through family relations, corporate boards, movies and TV, political alliances, and shadowy conspiracy groups. Maps can be saved and shared for others to explore.

As of this writing, the major demographic breakdown in NNDB is 23462 living, 13553 dead, 30136 male and 6877 female.

What is NNDB?

NNDB is an intelligence aggregator that tracks the activities of people we have determined to be noteworthy, both living and dead. Superficially, it seems much like a "Who's Who" where a noted person's curriculum vitae is available (the usual information such as date of birth, a biography, and other essential facts.)

But it mostly exists to document the connections between people, many of which are not always obvious. A person's otherwise inexplicable behavior is often understood by examining the crowd that person has been associating with.

Scope and Coverage

The **Notable Names Database (NNDB)** is an online database of biographical details of over 40,000 people of note. NNDB describes itself as an "intelligence aggregator" of those it determines to be noteworthy may be death and alive, but mostly to identify connections between people.

Person listed in NNDB includes-

- **Persons for whom the public has demonstrated a permanent interest.**
- **Holders of certain public offices, civic, or business positions.**
- **Individuals that have entries in selected reference works.**
- Information on the person must be publicly available, preferably from multiple sources. Material published by third parties of some repute is demonstrative of public interest. If the only data on a person is available directly from that individual, it is much less likely that person will be included. But this does not mean that statements made by that individual will not be considered when filling out a dossier.

Kind of Information

Entries description includes various attributes about a person such as full name, pseudonyms, birth and death, location of their remains, religious beliefs, gender, race or ethnicity, sexual orientation, family members, relationships and nationality.

Contentious facts are footnoted. Some entries have a brief prose biography, or contain facts or citations of note. Entries may contain summaries of the organizations they belong to, illnesses, phobias, addictions, drug use, criminal records, and other data. In the case of authors, actors, film directors, and architects, the entry lists the person's artistic works in chronological order.

Businesspeople and government officials have chronologies of their official posts and positions, as well as board memberships. NNDB also has articles on films with user-submitted reviews, discographies of selected music groups, and extensive bibliographies on most subjects.
