

**Home Page**

The screenshot shows the 'Famous Biologists' page on the 'Totally HISTORY' website. The page features a navigation bar with 'ART HISTORY', 'U.S. HISTORY', and 'WORLD HISTORY' tabs. A search bar is located in the top right corner. On the left, there is a 'NEWEST ADDITIONS' sidebar listing items like 'Cardinal and Theological Virtues', 'Madonna of Colonna', 'Portrait of a Young Woman', 'Victor Ortiz', and 'Julio Cesar Chavez, Jr.'. The main content area is titled 'Famous Biologists' and includes a CIBIL advertisement. Below the ad, there is a paragraph of text about the contributions of biologists throughout history. A section titled 'Biologists of Antiquity' features three busts: Hippocrates (c. 460 BC - c. 370 BC), Aristotle (384 BC - 322 BC), and Galen (c. 129 - c. 200-216).

**Brief History**

This site was established in 2012.

**Scope and Coverage**

Biologists throughout the world have made great finds and discoveries throughout history. Some of these discoveries have helped cure diseases, perform medical procedures, and

classify animals. Others have formed the basis of the medical profession. This site has been listed some of the famous biologists that have made significant contributions to various areas of life.

**Kind of Information**

Entry contains date of birth, date of death, nationality, fields, famous for which purpose, famous in which field, education, career, achievement, award, books and innovation etc with photograph. Under photo of each person, some points are highlighted regarding the biologists.

**Robert Brown**

Robert Brown, a famous botanist from Scotland, was a pioneer in the field of microscopy. He was one of the first botanists to completely describe the nucleus of cells while he also observed Brownian motion. He was also very influential in 'paleobotany', the study of primitive plant life.

Brown was one of the scientists on Matt Flinders's expedition of discovery to New Holland. On his voyage, he gathered many plant samples. He classified them and named many of them. His number of botanical writings and articles made him a highly respected and admired scientist of the century.

**Early Years**

Robert Brown was born on December 21, 1773, at Montrose, Scotland. He went to school at Montrose where he studied art. After that, he studied medicine at the University of Edinburg but did not finish his education. He became very enthusiastic about

<b>Specialty</b>	<b>Botanist</b>
