Website designed and maintained by MiracleworX Design India.

Kind of Information

The library website provides many ways to access its collection. Users are provided following catalog search options.

Basic search:

[Advanced search](#)
 To begin, type in the search box or use any of the other menu options.

In this quick search process users just have to put the search terms in the search bar.

Advanced search:

In advanced search process maximum three search terms can be given and three specific bibliographic fields have to be chosen.

| ... | Search For | Select Field | Specify Position In Field |
|-------|----------------------|--------------------|---------------------------|
| ... | <input type="text"/> | Any ▼ | Anywhere in the Field ▼ |
| And ▼ | <input type="text"/> | Title ▼ | Anywhere in the Field ▼ |
| And ▼ | <input type="text"/> | Author / Creator ▼ | Anywhere in the Field ▼ |

In advance search process, the search queries can be refined by material or item types, language, duration of publication year, duration of accession dates, and also by accession numbers range (the following screen shot).

Select Item Types: (dropdown menu)
 Digital Materials Only Language: (dropdown menu)

Publication Years: From To
 Accession Dates (dd-mm-yyyy): From To
 Accession Numbers: From To

By following above search process, one can get following kind of bibliographic records on a particular title.

| Item Details | | | | | | | |

Users can also browse the whole collection or the reference book collection, or media collection.

Special Features

- Current Awareness Services for new arrival titles are provided for the users.
- Have links to social networking sites like Face Book, Twitter, You Tube, etc.
- This health library portal also maintained library blog, patient advocacy service, help talks etc. for the betterments of the users in health issues.
- Current events' news also is provided through the library website time to time.
- Through the library website one can get answers to all of his health questions by the Health Experts.

Arrangement Pattern

The search process produces a list in which all the documents are arranged alphabetically by the title. But one can rearrange the list by author's name, subject, material type, etc.

The OPAC provides option to display the list of documents in tabular form. Users can change the display format of the list in which they can access the titles, author's name, publisher's name etc. Bibliographic fields of each document by this way can be accessed through this list.

Remarks

The library has a huge collection and includes different type of items relevant for people's health issues. The Library website has done a great job by giving different kind of health services to its users. Through its collection and through its services the library helps its users a lot.
