Brief History

AmosWEB is an Internet-based resource of economics information published by AmosWEB LLC. AmosWEB LLC was established April 1, 2000 to publish economics information and instructional resources through the World Wide Web. The most popular resource is the AmosWEB GLOSS*arama, an extensive glossary of economics terms and concepts also started its journey from 2000.

Scope and Coverage

The AmosWEB GLOSS*arama is a searchable glossary of 2000 economic terms and concepts. It covers all aspects of macro and micro economics such as price, cost, quantity, unemployment, production, wages, income etc. various core economics terms are also available here.

Kind of Information

Terms are available with meaning and explanation in this dictionary. Within some entries different terms are hyperlinked for further details. After each entry see also reference present. An example is given below for easy understanding.

Devaluation: The act of reducing the price (exchange rate) of one nation's currency in terms of other currencies. This is usually done by a government to lower the price of the country's exports and raise the price of foreign imports, which ultimately results in greater domestic production. The short- and long-run consequences of devaluation are described in the entry on the J curve. A government devalues its currency by actively selling it and buying foreign currencies through the foreign exchange market.

See also: [exchange rate](#) | [currency](#) | [export](#) | [import](#) | [J curve](#) | [foreign exchange market](#) | [revaluation](#) | [depreciation](#) |

End of an entry AmosWEB GLOSS*arama provide a citation style; which is given below for an example.

Recommended Citation:

DEVALUATION, AmosWEB GLOSS*arama, <http://www.AmosWEB.com>, AmosWEB LLC, 2000-2017. [Accessed: July 17, 2017].

Special Features

- ❖ It has links to e-tutorial on economics.
- ❖ Most viewed terms are available.
- ❖ Some quizzes are linked.
- ❖ Sitemap, contact option, feedback present.
- ❖ A search bar present for site search. Also a search bar present for Google custom search.

Arrangement Pattern

This tool provides A – Z, alphabetical browsing facilities. Again under a particular alphabet terms are arranged alphabetical order. An example is given below.

Under “D” entries are:

data
deadweight loss
death rate
debit card
debtor nation
decision lag

decision lag
decision making process
decline stage
decreasing marginal returns
decreasing returns to scale
decreasing-cost industry

Quick search option present in this tool.

Remarks

AmosWEB GLOSS arama is without question the best economics glossary available on the web.
