Directory of Research Journals Indexing

Brief History

Directory of Research Journals Indexing was established to provide coverage of the world's research journals to meet its authors' current research works and useful information retrieval needs.

Scope and Coverage

DRJI provides ready access to education literature to support the use of educational research and information to improve practice in learning, teaching, educational decision-making, and research. It supports index standards for indexers, editors, and abstractors. Each DRJI record contains bibliographic data (title, author, ISSN or ISBN, publisher information, etc.) and an abstract on multidisciplinary subjects. If made available by the publisher, DRJI includes links to the full text or the publisher's site. It has reviewed and evaluated thousands of resources to help the users to choose key websites in particular subject. Journal registration and indexing are free of cost. It also helps to increase presentation of journals to an international audience. DRJI supports a vast array of languages.

Kind of Information

In the '**Indexed Journals**' & '**Just included**' categories, all the journals can be seen with their titles, authors, URLs and countries. An example is given below :

Indexed Journals ::

Journal of Applied Pharmaceutical Research
Prof. Amit Roy
India
www.japtronline.com

In case of 'Journals under evaluation', the journals are listed only including the titles and names of the authors. No ISSN and URL are given in these cases. Such as :

Journals Under Evaluation::

NUML International Journal of Business & Management
OISSN : - 0000-0000
Dr. Faid Gul
Pakistan

DRJI launches its new concept of ranking of journals known as "DRJI Value." It's just ranking of journals based on several article publishing techniques which is helpful for improvisation of journals and also article publishing quality and technique.

DRJI value assigned journals list provides a table containing the names of journals, DRJI values and grade points. Example is given below :

Sr No.	Journal Name	DRJI Value	Grade
1	International Journal of New Computer Architectures and their Applications (IJNCAA)	5.25	B+
2	ESSACHESS - JOURNAL FOR COMMUNICATION STUDIES	3.97	B

It provides list of editors. It also covers information on its associated partners by giving their names, logos, hyperlinks and description.

Statistics shows the total numbers of journals under each category. Those are: Indexed Journals – 3678, Agreement Pending – 13, Under Evaluation – 2, Just Included – 13 and Total Articles – 96381.

Journals that upload regular articles in DRJI database are considered for DRJI Value. Evaluation method for DRJI value (based on different criteria) shows a table as follows :

Evaluation Point	Value
Articles published for each issue.	50
Discipline of the journal	30
Journals presense in various indexing services	50
Type of Access of articles on journal	20

Selection criteria for DRJI indexing, guidelines for publishers and concepts of indexing method, open access etc. have been discussed here.

Special Features

- Users can search this directory.
- Other links including the links of its associate partners are given. Some of those are EBSCO, University of London, WorldCat, UNINOVE etc.
- FAQs & feedback facilities are provided for users.
- Browsing can be done from several aspects like by country, by license, by discipline, by frequency etc.

Arrangement Pattern No. of journals are arranged country wise as shown below :

COUNTRY	No. of JOURNALS
FINLAND	2
MARTINIQUE	1
RWANDA	1
BAHRAIN	10

Remarks Directory of Research Journal Indexing (DRJI) is one of the world's most voluminous search engines especially for academic open access web resources. It is to increase the visibility and ease of use of scientific and scholarly journals thereby promoting their increased usage and impact. DRJI encourages the participation of all persons, groups, and organizations interested in indexing and related methods of information retrieval.
