Brief History

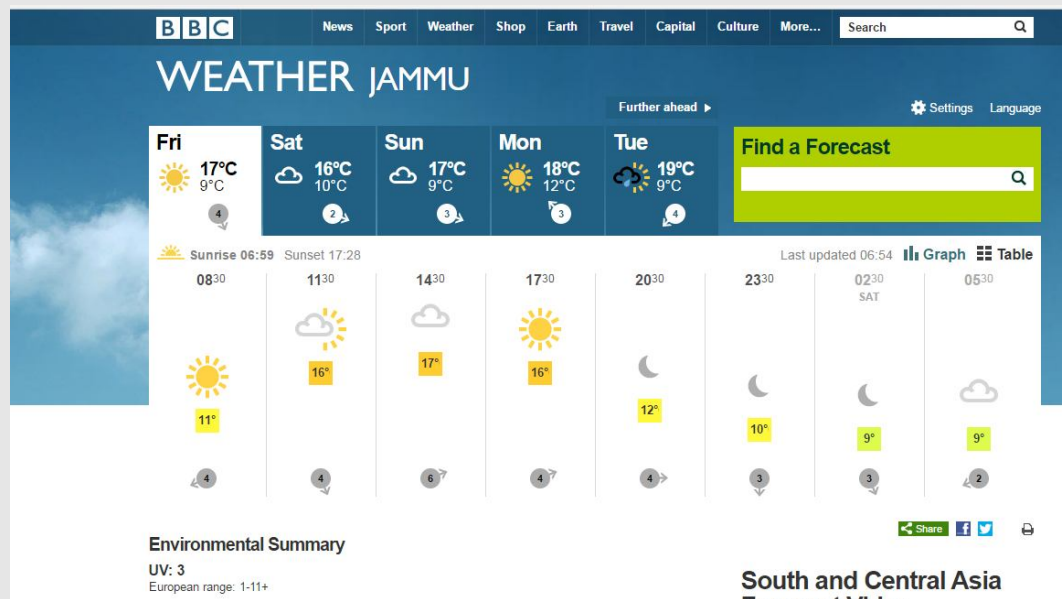

On 11 January 1954, the first in-vision weather forecast was broadcast, presented by George Cowling. In 2015, it was leaked that the Met Office had been left out of the final phase of bidding for the supply of BBC Weather forecasts for TV, radio and the BBC website. The website launched in 1997.

## Scope and Coverage

This site covers world weather, UK outlook and weather news. The website contains information about nature and meteorological science. It presents news summary, travel tips, world discoveries with videos, day wise weather summary. It covers world weather specially emphasizes on UK.

## Kind of Information

Each entry contains day wise weather report, humidity, and pressure. It also represents future weather and also last 5 days weather. Environment summary is also available.

## Special Features

- ❖ The website runs frequent special features about seasonal sports, shops, culture, news and more.
- ❖ Links to [download.radiorange.com](http://download.radiorange.com) for downloading free online radio and [weather-update.co](http://weather-update.co) for getting local area update and [mapgalaxy.com](http://mapgalaxy.com) for searching maps, get driving direction etc.

## Arrangement Pattern

Entries are arranged alphabetically whenever entries are searched by countries. Entries can be searched by UK post code and by town.

## Remarks

This is the one of the best weather forecasting site and covers huge area. It describes natural sciences, meteorological sciences and weather news. It is very helpful for

travellers to make decision while travelling.
