Language

Bilingual (available in English & Russian)

Publisher

ImageShack Corp.

Brief History

The site was launched in November 2003.

Scope and Coverage

ImageShack covers all types of photos.

Kind of Information

ImageShack is a subscription-based image hosting website headquartered at Los Gatos, California.

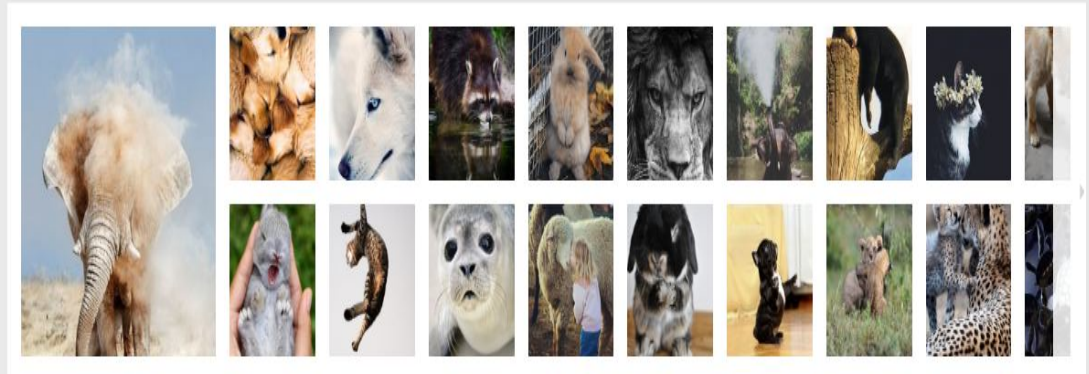

ImageShack is an intuitive and easy to use image hosting service. It can be used to upload and share images across a variety of popular platforms.

A subscription is required to have full access to all the features ImageShack has to offer. However, they do a free 30 day trial to give people a sneak peak into what we're all about. We have a variety of different subscription plans available to suit a wide array of our customers' needs.

The main page has a file selection field, where the user may select the image file to upload. The image file format must be either JPEG (JPG), PNG, GIF, TIFF (TIF), or BMP, and the file must be smaller than or equal to 5 megabytes (free service) or 10 megabytes (subscription service). Uploaded BMP and TIFF (TIF) images are automatically converted to PNG format.

All uploaded images are categorized in this site, an example of animals category is given here. Visitors can see & save these photos by selecting one by one.

Animals

Special Features

- ❖ Optional registration is available for uploading files. There is also a free registration service that gives the user the ability to see and delete their previously uploaded images. In the past, users were able to upload images anonymously, without an account. In 2013, ImageShack stopped accepting image uploads from anonymous users, so users who had signed up would have to log in or register to upload images.

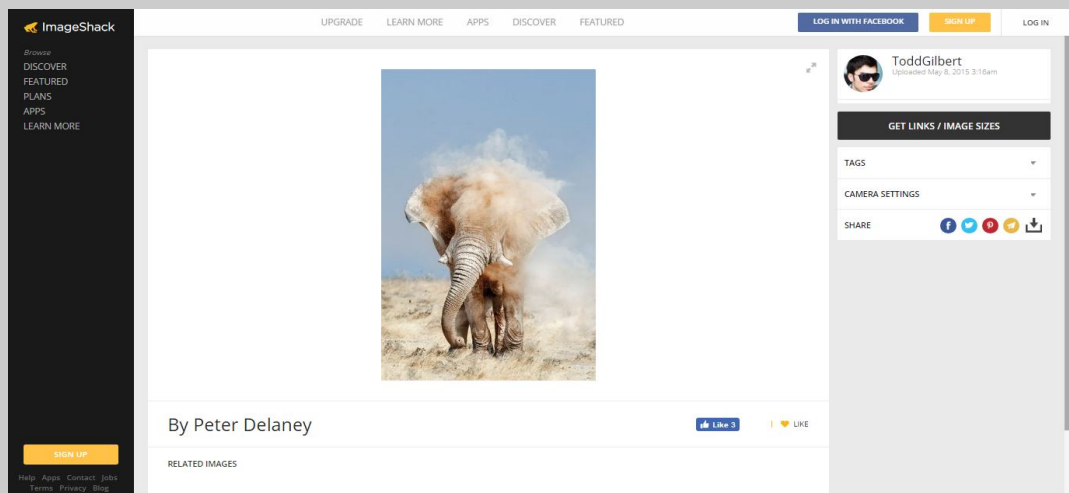

- ❖ ImageShack also provides a standalone open-source application for users to upload images and videos. The ImageShack uploader is available for Windows, Mac, and Linux.

Visitors can share photos to social networking sites, can email to others and download using these below options from this site.

They need to click

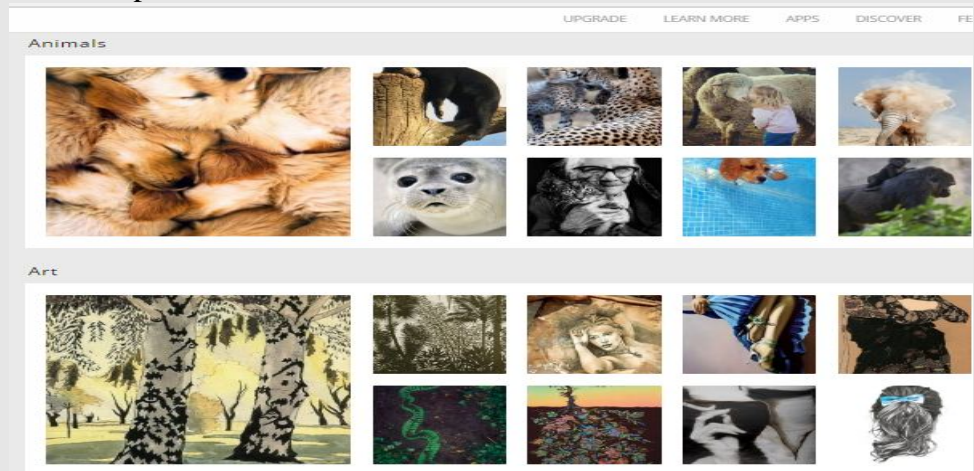

these options to share and download.

Arrangement Pattern

All the images are arranged categorically and these categories are arranged alphabetically.

As for example,

Remarks

Photographers can upload their photos to ImageShack, here unlimited spaces are provided to upload unlimited photos. Photographers also safe their high-res photos to the cloud of ImageShack.
