Language	English
Publisher	Information Today, Inc
Brief History	The Annual Review of Information Science and Technology is produced for the Association for Information Science & Technology (ASIST) and published by Information Today, Inc. The Society (then the American Documentation Institute) initiated the series in 1966 with the publication of Volume 1 under the editorship of Carlos A. Cuadra, who continued as Editor through Volume 10. Martha E. Williams took over the editorship with Volume 11 and passed the baton to Blaise Cronin with

Volume 36. ASIST is the sole owner of ARIST, maintains editorial control, and has sole rights to the series in all forms. Through the years, several organizations have been responsible for publishing and marketing ARIST. Volumes 1 and 2 were published by Interscience Publishers, a division of John Wiley & Sons. Volume 3 to 6 were published by Encyclopaedia Britannica, Inc. Volumes 7 through 11 were published by the Association for Information Science itself. Volumes 12 through 21 were published by Knowledge Industry Publications, Inc. Volumes 22 through 25 were published by Elsevier Science Publishers B.V., Amsterdam, The Netherlands. With Volume 26, Information Today, Inc. (formerly Learned Information, Inc.) assumed the role of publisher of ARIST for ASIST.The Annual Review of Information Science and Technology was an annual review journal published from 1966 to 2011.

Scope and Coverage

The Annual Review of Information Science and Technology is produced for the Association for Information Science & Technology (ASIST). The orientation of, and time period covered by, each chapter will vary, depending on the author's expertise and on whether the topic has been treated previously by ARIST and, if so, on the length of the interval from the last treatment to the current one. One volume is published each year. The range of coverage of topics varies considerably, reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives connoted by the rubric 'information science and technology'. While ARIST continues to cover key topics associated with 'classical' information science (e.g., bibliometrics, information retrieval), the Review is expanding its footprint, prudently and selectively, in an effort to connect information science more tightly with cognate academic and professional communities. The subjects selected and their coverage reflects the evolution and maturation of the domain. ARIST chapters are scholarly reviews of topics substantiated by reference to the published literature. The aim is to furnish the reader with a complete picture of the state-of-the-art for each focal area.

Kind of Information

The Annual Review of Information Science and Technology (ARIST) is long been considered a landmark publication within the information science community. It surveys the landscape of information science and technology, providing the reader with an analytical, authoritative and accessible overview of recent trends and significant developments. ARIST is an annual publication that reviews a wide range of topics and trends within the broad fields of information science and technology. The contents vary from year to year: no single topic is treated on an annual basis. Instructions for authors for submitting a ARIST manuscript is given, current and recent volumes of ARIST are given, and search can be done in ‘Search ARIST chapters’ by title, author or thesaurus ARIST volumes are divided into current and recent volumes. The contents of the volumes are divided into different sections and each of them is subdivided into different chapters.

As the Annual Review of Information Science and Technology is produced for the Association for Information Science & Technology (ASIST) and published by Information Today, Inc., ARIST links directly with ASIS&T and gives all the information about ASIS&T. Publisher of ASIS&T includes IIT blogs, conferences etc. Through ASIS&T carrier guidance, how to join ASIS&T, events, news and publications etc. can be known. Different types of e-books are available on ASIS&T monograph series, proceedings, annual reviews and classification search are under ASIS&T and most of them are free. Format for ARIST citations and bibliographic references, how to write a manuscript while submitting ARTIST manuscript is given under 'Instructions for Authors'.

Special Features	News Breaks, weekly news digest, ITI blogs, Conferences are given on ARIST.
Arrangement Pattern	The Volumes of ARIST are arranged year wise (from current – Older) and the each volume is divided into different sections.
Remarks	ARIST is an annual publication that reviews a wide range of topics and trends within the broad fields of information science and technology.
