

Home Page

The screenshot shows the home page of the Clinical Microbiology Reviews (CMR) journal. At the top left is the American Society for Microbiology (ASM) logo and the journal title 'Clinical Microbiology Reviews'. Below this is a navigation menu with links for HOME, CURRENT ISSUE, ARCHIVE, ALERTS, ABOUT ASM, CONTACT US, TECH SUPPORT, and Journals.ASM.org. On the right side, there is a user login section with fields for User Name and Password, and a LOG-IN button. Below the navigation is a search bar with a 'Keywords' input field and an 'Advanced' search option. The main content area features a large image of the journal cover for 'CMR Clinical Microbiology Reviews' with the title 'How to Submit Topic Ideas to Clinical ...' and a video thumbnail. Below the cover is a link to 'Members of the CMR Editorial Board >>'. To the right of the main content is a sidebar with various links: About CMR, Subscribers, Authors, Reviewers, Advertisers, Inquiries from the Press, Permissions & Commercial Reprints, ASM Journals Public Access Policy, and CMR RSS Feeds. At the bottom right of the sidebar is a 'Submit to CMR' button and a 'MOST Read Cited' section with a link to 'Zika Virus'.

## Brief History

Clinical Microbiology Reviews (CMR) started its journey from 1988 and published quarterly (January, April, July, and October), one volume per year, by the American Society for Microbiology (ASM). The founding editor was Josephine A. Morello (University of Chicago Medical Center). Editorial board structure changed in 1992 and Morello became editor-in-chief. Betty Ann Forbes (State University of New York) was appointed editor-in-chief in 1997. Irving Nachamkin (University of Pennsylvania) was appointed editor-in-chief in 2002 until 2012. Jo-Anne H. Young's (University of Minnesota) term as editor-in-chief ends in 2017.

## Scope and Coverage

*Clinical Microbiology Reviews* (CMR) analyzes the latest developments in clinical microbiology and immunology. Key topics include pathogenic mechanisms, individual and groups of microbial pathogens, clinical and laboratory aspects of newly recognized and reemerging infectious diseases, antimicrobial agents and their applications, and diagnostic laboratory technologies. Clinical and medical microbiologists, immunologists, epidemiologists, pathologists, public health workers, and infectious disease specialists all turn to the journal to discover not only the current state of knowledge in the field, but also balanced, thought-provoking perspectives on controversial issues of the day.

The scope of *Clinical Microbiology Reviews* covers: Pathogenic mechanisms, Specific or groups of microbial pathogens, Clinical and laboratory aspects of newly recognized or reemerging infectious diseases, Recently developed antimicrobial agents and their applications & New diagnostic laboratory technology.

## Kind of Information

Clinical Microbiology Reviews (CMR) is a peer-reviewed academic journal that publishes scholarly works of interest in the areas of clinical microbiology, immunology, medical microbiology, infectious diseases, veterinary microbiology, and microbial pathogenesis. It is a delayed open access journal; full content is accessible via PubMed Central and the journal's website after a 12-month embargo. In April 2015, the journal transitioned to a continuous online publication model for CMR.

The screenshot displays a list of reviews under the heading "Reviews". Each entry includes a title, author(s), journal information, and a DOI number. Below each entry are links for "Abstract", "Full Text", "PDF", "Figures", "Author Bios", and "Reprints and Permissions".

Each review comes with abstract, full text, PDF and author bios. The title of book that is reviewed shows the DOI number, reviewer name, summary of the article etc.

Table of contents of articles are arranged under 'Free Content from ASM' & 'Sponsored Open Access'. References & footnotes against each title are also given in the last portion of each review article.

**Special Features**

- ❖ Links with Journals.ASM.org
- ❖ It gives access to HighWire Press, a Scholarly publishing company.
- ❖ E-alert is given to the subscribe users when new content is arrived.

**Arrangement Pattern**

Volumes are shown in two different tables. One is **Full Text and Abstracts: January 1998 – Present**; another is **Full Text (PDF Format Only) and Abstracts: January 1988 - October 1997**. Volumes are arranged era wise and then year wise (Such as...2000s contains all the volumes from 2000-2009). Under each year/volume issues are arranged chronologically (month-wise). In an issue articles are arranged content wise.

Full Text and Abstracts: January 1998 - Present										
2010s	2010	2011	2012	2013	2014	2015	2016	2017	-	-
2000s	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009
1990s	-	-	-	-	-	-	-	-	1998	1999

  

Full Text (PDF Format Only) and Abstracts: January 1988 - October 1997										
1990s	1990	1991	1992	1993	1994	1995	1996	1997	-	-
1980s	-	-	-	-	-	-	-	-	1988	1989

  

**Archive of 2010 Online Issues**

Cover Image Archive for 2010

**« 2010 »**

January; 23 (1): 1 - 251    April; 23 (2): 253 - 466

July; 23 (3): 467 - 687    October; 23 (4): 689 - 928

**Remarks**

Clinical Microbiology Reviews considers for publication both solicited and unsolicited reviews and monographs dealing with all aspects of clinical microbiology. According to the Journal Citation Reports, the journal has a 2014 impact factor of 17.406, ranking it 2nd out of 119 journals in the category "Microbiology".
