Brief History

The International Political Science Review was established in 1980 and is published by Sage Publications on behalf of the International Political Science Association.

Scope and Coverage

The International Political Science Review (*IPSR*) is the journal of the International Political Science Association. It is committed to publishing peer-reviewed articles that make a significant contribution to international political science. It seeks to appeal to

political scientists throughout the world and in all sub-fields of the discipline who are interested in studying political phenomena in the context of increasing international interdependence and change.

The International Political Science Review covers the field of political science. The editors-in-chief are Mark Kesselman (Columbia University) and Marian Sawer (Australian National University).

Kind of Information

The International Political Science Review (IPSR) is the journal of the International Political Science Association. It is committed to publishing peer-reviewed articles that make a significant contribution to international political science. It seeks to meet the needs of political scientists throughout the world who are interested in studying political phenomena in the context of global interdependence and change. IPSR reflects the aims and intellectual tradition of its parent body, the International Political Science Association: to foster the creation and dissemination of rigorous political inquiry while respecting a plurality of approaches. IPSR welcomes articles reporting research on substantive topics, concepts, and/or methodologies in all fields of political science. It is expected that authors will establish the significance of their research question, locate it within the relevant literature, and clearly set out the research design through which they intend addressing the question. Single-country case studies analyses the theoretical and comparative implications of the case. The fourth issue of most volumes is devoted to review articles on topics within political science that have recently been the focus of extensive research.

Reviews can be searched from 'All Issues' and that is presented in PDF format or in full-text format. Related articles are also given.

The screenshot displays two article entries from the International Political Science Review (IPSR) journal. Each entry is presented in a white box with a green lock icon on the left. The first entry is titled "Measuring the quality of democracy: Introduction" by Brigitte Geissel, Marianne Kneuer, and Hans-Joachim Lauth, first published on November 22, 2016, pages 571-579. Below the title and authors is a "Show Abstract" link and three circular icons: a document, a citation, and a key. The second entry is titled "Measuring high level democratic principles using the V-Dem data" by Michael Coppedge, Staffan Lindberg, Svend-Erik Skaaning, and Jan Teorell, first published on December 29, 2015, pages 580-593. It also features a "Show Abstract" link and the same three circular icons.

There are some submission guidelines for authors/ Researcher/Users while submitting an article for review.

Visitors can read online version of the IPSR, can see sample issues, current issue through the links provided by Sage Publication. Permissions, Foreign rights, different
