ESCAP Statistical Database

Learning & Training

- Access the ESCAP Statistical Database

The ESCAP Statistical database provides a regional perspective on development issues in Asia and the Pacific. It contains over 350 indicators disaggregated into over 1200 data series organized in 16 domains. SDG global indicators for which data is available have been incorporated into the ESCAP database.

Data is presented for the 58 regional ESCAP members as well as for a large number of country groupings relevant in analyzing development in the region. Data is sourced from international data sources to ensure

**Subject** Statistics - United Nations

**Accessibility** Free

**Language** English

**Publisher** United Nations ESCAP

**Brief History** It was established in 1947 with its headquarters in Bangkok, Thailand.

**Scope and Coverage** The ESCAP Statistical database provides a regional perspective on development issues in Asia and the Pacific. It contains over 350 indicators disaggregated into over 1200 data series organized in 16 domains. SDG global indicators for which data is available have been incorporated into the ESCAP database. It provides quality statistics i.e. relevant, accurate, timely, value for money, accessible to all and free from political interference. Together with the Statistical Institute for Asia and the Pacific (SIAP), ESCAP works with member States to increase their capacity to produce, disseminate and use statistics in accordance with internationally agreed standards.

**Kind of Information** Data is presented for the 58 regional ESCAP members as well as for a large number of country groupings relevant in analyzing development in the region. Data is sourced from international data sources to ensure comparability across countries and is updated regularly to maintain the database as a comprehensive statistical resource on development in Asia-Pacific. It gives statistics of different subjects. Each of those topics are given with a photograph and brief description as follows:

#### Economic Statistics

Sound economic policy decisions can be made only if they can be backed up by evidence. At a time when economic crises are recurring, the emphasis on having reliable and timely economic data is even stronger.

Each of those also provides information on publication, upcoming events, recent events, highlights, related topics and related links etc.

Different categories are displayed with their respective icons and small description as shown below:

While one of those categories is clicked on, that provides metadata and resultant data. Results are represented both in tabular and pivotal formats. Indicators, years, regions and data series etc. are to be selected wherever needed. As for example, adult/child sex ratios (child population) of Hong Kong, China gives the following result:

**Indicator :** Adult/child sex ratios-Child population-Child population

**Unit :** Boys per 100 girls

**Citation :** ESCAP Online Statistical Database based on data from the United Nations, World Population Prospects - 2015 revision, 13 August 2015. Available from [http://data.unescap.org/escap\\_stat/](http://data.unescap.org/escap_stat/) (accessed 17 April 2017)

COUNTRY CODE	COUNTRY	UNIT CODE	UNIT	INDICATOR CLASSIFICATION	INDICATOR NAME	YEAR	DATA VALUE
33364	Hong Kong, China	2515	Boys per 100 girls	010.040.010	Adult/child sex ratios-Child population	2009	106.8889999389648...

Data can be compared also and that can be seen by graphical representation. It also provides information on statistical methods. Information is also provided on statistical yearbook. Latest updates are given with title, date, place & brief description.

### Special Features

- Statistical yearbook can be downloaded.
- Charts can be printed directly and can be saved as different image formats like PNG, JPEG etc
- ESCAP newsletters are sent to subscribed users via e-mail.

### Arrangement Pattern

Statistical topics are arranged alphabetically as follows:

Civil Registration and Vital Statistics
Data and Analysis
Economic Statistics
Environment and Agricultural Statistics
Gender Statistics

**Remarks**

It works to improve the use of statistics for evidence-based decision-making and to develop and disseminate quality statistics for inclusive, sustainable and resilient societies in the ESCAP region.
