World Statistics

Brief History

Subject to research

### Scope and Coverage

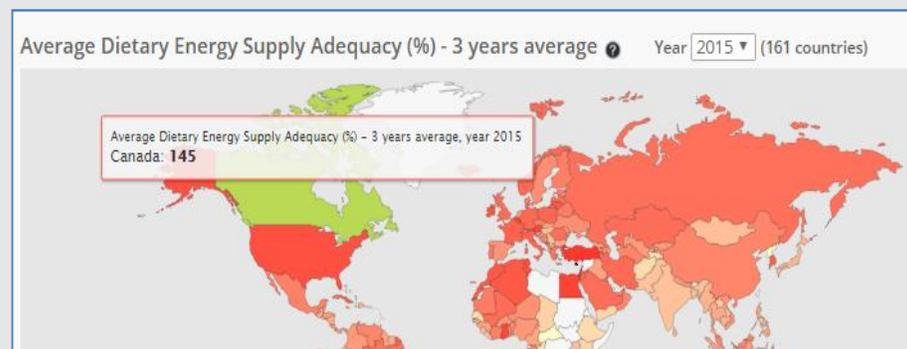

It covers information on the total no. of world population, undernourished people, GDP (current US\$), CO2 emissions (KT) etc. It helps to get access to relevant data of international organizations. World Statistics gives user-friendly access to a selection of indicators, carefully selected to meet the most important needs of decision-makers, analysts, journalists, researchers, students and other users. All these indicators can be easily searched, visualized as tables, maps or graphs, and downloaded for further processing.

### Kind of Information

It gives information on several topics like agriculture, forestry and fisheries, economy and finance, education, culture and communication, environment and energy, health, income-wages, labour, population, poverty and development, tourism, violence-crime etc. Each of those categories provides information on their related statistics, useful hyperlinks, publications and other detail including the sub categories also. Such as, 'health' gives information also on cause of death, disease prevention, health services, nutrition, reproductive health, risk factors. Its publication is given here also i.e. WHO's annual world health statistics reports. International migrants are displayed in maps. Important information on different topics like world population, undernourished people, GDP (current US\$), CO2 emissions (KT) etc. with source and time as can be seen below :

<b>WORLD POPULATION</b> NOW <b>7,497,298,922</b> <small>Based on UN World Prospects, 2015 rev.</small>	<b>UNDERNOURISHED PEOPLE</b> 2015 <b>792.50 MILLION</b> <small>Source: FAO</small>	<b>GDP (CURRENT US\$)</b> THIS YEAR <b>21,638.643 BILLION</b> <small>Based on IMF data</small>	<b>CO2 EMISSIONS (KT)</b> 2013 <b>35,848,592</b> <small>Source: World Bank</small>
---	---	---	---

If a visitor clicks on an indicator that shows several sub categories and each of those sub categories further displayed with different type of graphical representation and maps. As for example, food security is one of the sub categories of agriculture. Average Dietary Energy Supply Adequacy (%) - 3 years average can be seen by maps as follows :

World statistics org. displays its blogs with date and photographs. Such as:

MAR 24 The trade of cultural goods doubled during the period 2004-2013 despite a global recession and a massive shift among consumers of movies and music towards web-based services.

A new report from the UNESCO Institute for Statistics (UIS), *The Globalisation of Cultural Trade: A Shift in Consumption—International flows of cultural goods and services 2004-2013*, takes an in-depth look at the export and import of cultural goods and services around the world.

List of national statistical offices and international organizations are listed alphabetically with their relevant hyperlinks. Article is given on ‘2020 round of population and housing censuses’. This website gives information on population of localities.

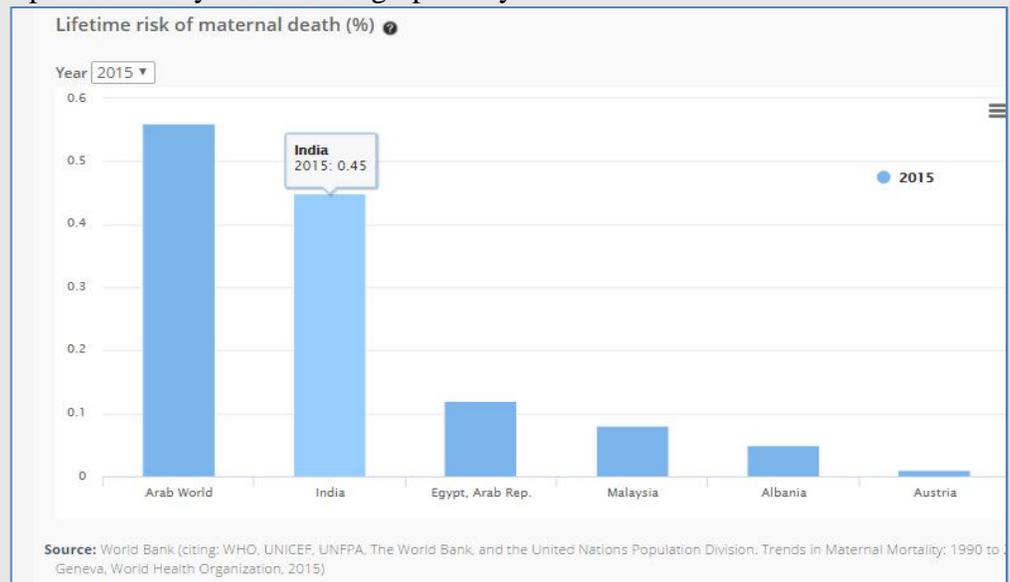

Graphical representation and tabulated data can be seen after analysing the indicator. Such as lifetime risk of maternal death(%) in Africa shows the following result :

Lifetime risk of maternal death (%)

Display: 10 lines

Country	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015
Albania	0.05	0.05	0.05	0.05	0.05	0.05	0.05	0.05	0.05	0.05	0.05

Comparative study can be seen graphically as shown below:

### Special Features

- Indicators can be searched easily.
- Hyperlinks of FAO, ILO, World Bank are also given here.
- Some data can be downloaded.

**Arrangement Pattern**

News are arranged in descending chronological order as follows:

**NEWS**

9 February 2017 **Census Canada 2016: first results**  
First results of the 2016 census of Canada at the national, provincial and territorial levels, as well as for metropolitan areas now available. See [Population of localities](#)

4 January 2017 **France Population 2014**  
New official populations of France and all administrative divisions. See [Population of localities](#)

Indicators are arranged alphabetically as shown below:

**INDICATORS**

- Agriculture, forestry and fisheries
- Culture and Communication
- Development
- Economy and Finance

**Remarks**

World Statistics gives free and easy access to data provided by International Organisations, such as the World Bank, the United Nations and Eurostat. It fully supports and applies the UN International Principles governing international statistical activities.

**Comparable Tools**

➤ [Worldometers](http://www.worldometers.info/) - real time world statistics ( [www.worldometers.info/](http://www.worldometers.info/) )

**Date of Access**

12<sup>th</sup> April' 2017.
